PROFESSIONAL SUMMARY

BS Software Engineering student (5th semester) with a front-end development focus in HTML, CSS, and JavaScript. Builds responsive, API-driven web applications through self-directed projects and is comfortable working across the front-end stack from layout to interactivity. Seeking a Front-End Developer internship or entry-level role to grow within a professional development team.

TECHNICAL SKILLS

HTML5 & Semantic HTML • CSS3 & Responsive Web Design • JavaScript (ES6+) • REST APIs / Fetch API • Git & GitHub • VS Code

PROJECTS

Weather App — 5-Day Forecast | *HTML, CSS, JavaScript, OpenWeather API*

- Built a responsive weather application that fetches real-time data from the OpenWeather API to display current conditions and a 5-day forecast.
- Implemented city-based search so users can look up weather data for different locations.
- Designed a layout that adapts cleanly across desktop and mobile screen sizes.

Typing Practice | *HTML, CSS, JavaScript*

- Developed a 60-second typing test that calculates Words Per Minute (WPM) and Characters Per Minute (CPM) in real time.
- Implemented character-level mistake tracking with visual indicators for correct and incorrect input.
- Added a restart/try-again flow so users can immediately repeat the test.

Fylo Landing Page | *HTML, CSS*

- Recreated the Fylo landing page design with attention to layout accuracy, spacing, and typography.
- Built a fully responsive layout for desktop and mobile using CSS Flexbox and Grid.

EDUCATION

BS Software Engineering — The Islamia University of Bahawalpur
5th Semester | CGPA: 3.59

Intermediate (ICS) — Superior College ABK
2022 – 2024 | 82%

Matriculation — Government High School Manak Hiraj
2020 – 2022 | 92%

LEADERSHIP

- Class Representative (CR) — served as a point of coordination between students and faculty for class-related matters.

LANGUAGES

Urdu — Native | English — Basic
